FROM TANKS & PIPEWORKS LIMITED

**A Certified, Patented, Triple skin,
Tank Lining System designed for
Petroleum and Diesel Storage Tanks.**

TRY-LINE - rugged storage tank lining system.

UK Patent Nos.
GB 2 474 038 B and GB 2 474 096B

KINGSLODGE, LONDON ROAD, WEST KINGSDOWN, KENT, TN15 6AR. UK.

“We consider Try-Line as the best tank lining system available”

Tank Lining is a specialist process that requires the use of specialist materials and technologies coupled with a precise knowledge and experience that few companies can offer.

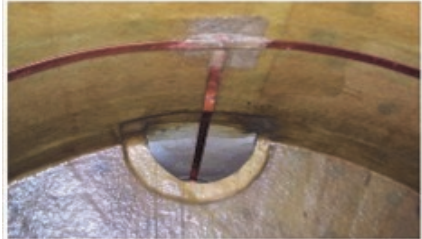

Try-Line is the result of many years development and we consider it to be the best tank lining system available. It is a patented, triple skin construction that uses specially formulated fuel compatible resins. Additionally, it features built in protection from static discharges for added safety.

Designed and certified to meet the requirements of EN13160-7, Try-Line offers 100% interstitial monitoring using a unique cable monitoring system that will detect signal failure. All Try-Line installation are independently inspected on completion to EEMUA 159 providing our customers with a warranty that few competitors can meet.

Try-Line provides the ultimate in tank lining.

Try-Line has been designed and manufactured in the UK by Tanks & Pipeworks Limited. This leaflet is for guidance only and provides an outline of the storage tank lining service offered.

Please note that at present we are only able to offer this service to customers in the UK & Ireland.

STORAGE TANK LINING

TRIPLE SKIN CONSTRUCTION - uses quality materials and resins that are guaranteed fuel resistant.

BUILT IN PROTECTION - features built-in protection against static electricity discharge. Features a unique system that constantly monitors and detects for cable failure.

PATENTED SYSTEM - Try-Line is a patented tank lining system uniquely available in the UK and Ireland only from Tank & Pipeworks Limited. (UK Patent Nos. GB 2 474 038 B and GB 2 474 096B).

INTERSTICE MONITORING - 100% of the tank is provided with interstice monitoring. Can be installed with Class 1 or Class 2 detection systems.

EN13160-7 CERTIFIED - TUV Certificate of Compliance to EN13160-7

THIRD PARTY INSPECTION - Independent third party inspection to EEMUA 159

TRAINED INSTALLERS - all installations are carried out by our own trained and experienced installers. For quality purposes no third party contractors are used.

FEATURES	BENEFITS
Triple skin design EN 13160-7 Certified Petroleum resistant materials Patented	Better environmental protection Compliant to European Standard Longer life expectancy Unique design
Built-in protection against static discharge with cable monitoring	Enhanced safety feature
100% interstice monitoring	Complete monitoring of tank Can be supplied with Class 1 or Class 2 leak detection systems
Third party inspection to EEMUA 159	Independent inspection provides confidence in workmanship.
